

Glass Link

Glass Link is an elegantly designed, continuous modular rooflight providing a striking addition to large and linear spaces. Glass Link is manufactured to specific requirements and easy to fit. Factory glazed modules simply lap together to form continuous rooflights of unlimited length. All modules are flush and deliver a clean slimline appearance allowing daylight to be maximised through large glazed areas with minimal framing.

Benefits

- Guaranteed weather tightness with factory glazed modules requiring no on site glazing sealant
- Suitable for pitches of 2°-35° providing a versatile solution for a variety of applications
- Elegant aluminium framework powder coated to fashionable anthracite grey RAL 7016 outside and white RAL 9010 inside
- Highly thermally efficient with thermally broken frame and glazed with Low-E insulated double glazed glass
- Safety of those below and above the rooflight assured thanks to laminated inner pane and product achieving non-fragility to CWCT TN-67 (for class 2 roofs) and Class B non-fragile to ACR[M]001 when new and fully installed to Brett Martin installation guidelines
- 10 yr commercial product warranty
- BRE Globally Verified EPD (Environmental Product Declaration) - specific configurations

Features

Fixed, non-opening rooflights are Secured by Design as standard

Rooflights with opening modules include optional manual or mains powered operation depending on size

Powered opening modules include wall switch, remote and rain sensor control options, as well as control panels for simultaneous operation

Multipane modules - can be glazed with multiple panes avoiding heavier and more expensive glass specification

Special glass options: solar control, tinted, obscure and self-cleaning

Tested to be non-fragile*, and with a laminated inner pane, for the **safety of those above and below.**

*to CWCT TN67 for class 2 roofs when new and fully installed in accordance with our instructions
